SUMMARY

I am a final-year Computer Science student at Al-Hussein Technical University with a strong focus on Product Engineering and the Software Development Life Cycle (SDLC). Skilled in bridging technical execution with business strategy through feasibility studies and evolutionary prototyping, demonstrated through leading the development of consumer applications like a smart grocery assistant. Proficient in Agile Scrum, requirements analysis, and system design, with diverse professional experience in sales and customer service gained from roles at Black Oasis and Extensya.

EDUCATION

Al-Hussein Technical University | Amman, Jordan *September 2022 — Present*
Technical Degree in Computer Science

Project

Ingreedy - Smart Grocery Assistant
Successfully led the evolutionary prototyping process from low-fidelity sketches to a functional high-fidelity application, managing the end-to-end design workflow, which resulted in the implementation of a social "Activity Board" that increased user engagement based on usability session feedback. Led the development and implementation of A/B testing on UI components, aligning product features with user needs through comprehensive research artifacts like Personas and Value Proposition Canvases, delivering a data-backed interface, and contributing to a significant reduction in friction within the user journey.

Noqodi Automated Financial Planning System
Successfully designed a proposal for an AI-driven financial planning module, managing the requirements engineering phase, which resulted in a structured system architecture modeled via UML sequence and data flow diagrams. Led the development and implementation of a comprehensive feasibility study (Technical, Economic, Operational) and ROI analysis, aligning stakeholder priorities gathered via surveys, delivering predictive cash flow forecasting features, and contributing to the mitigation of technical integration risks through a recommended Agile Scrum approach.

Skill

Skills: Java, C, PHP, CSS, System Design & Analysis, Prototyping, Agile Scrum, Technical Architecture Modeling, Emotional Intelligence, Leadership, Adaptability, Time Management, Communication.

WORK EXPERIENCE

Black Oasis | Amman, Jordan January 2025- February 2025
Sales

- Prospected via cold calls and social outreach, generating over $4,000 in a qualified sales pipeline within the first month.
- Partnered with marketing to refine messaging, significantly improving lead-to-meeting conversion rates.

Black Oasis | Amman, Jordan September 2024- December 2024
Support Agent

- Handled up to 500 calls per day, qualifying prospects, addressing objections, and building rapport using persuasive communication.
- Diagnosed client needs, resolved issues, and routed complex cases to the right teams to maintain service levels.
- Communicated with US-based clients in clear, professional English across phone.
- Documented interactions in CRM and followed up to ensure timely resolution and conversion.

Extensya | Amman, Jordan January 2023- May 2023
Customer Service Agent

- Performed customer due diligence (CDD): identity verification, risk assessment, and documentation of business relationships.
- Collected KYC documentation from customers and explained regulatory requirements.
- Coordinated with internal teams and completed training to stay current with policy and regulatory changes.

GoCardi | Amman, Jordan November 2022- March 2023
Marketing Team Member

- Created customer-focused, SEO-aware product descriptions informed by market and competitor research.

- Resolved inquiries and complaints across email and social channels with empathy, within agreed timelines.
- Curated a trend-based events calendar and planned/published social posts to drive engagement and brand awareness.
- Partnered with cross-functional teams to ensure consistent messaging and timely launches.

Cashu | Dubai, United Arab Emirates March 2021 - June 2021

Graphic designer

- Designed marketing assets (social posts, banners, email graphics) aligned with brand guidelines.
- Partnered with marketing and product to translate briefs into clear visuals and iterate quickly on feedback.
- Delivered web- and print-ready files using Adobe Creative Cloud, reducing revision cycles and turnaround time.

Cashu | Dubai, United Arab Emirates January 2021- March 2021

KYC Officer

- Performed customer due diligence (CDD): identity verification, risk assessment, and documentation of business relationships.
- Collected KYC documentation from customers and explained regulatory requirements.
- Coordinated with internal teams and completed training to stay current with policy and regulatory changes.

LEADERSHIP ACTIVITIES

DesignAR Technologies | Team Leader

Successfully led a cross-functional team of five visionaries to develop an Augmented Reality interior designer platform , managing the transition from problem identification to a functional prototype , which resulted in a scalable subscription model. I led the development and implementation of the Go-to-Market strategy , aligning team priorities around a unique selling proposition of empowering design vision through cutting-edge AR technology , delivering a high-impact pitch for an investment.

Alasriyya Model United Nations (MUN) | Delegate September 2020 - November 2020

- Developed high-level negotiation and public speaking skills by representing assigned nations in diplomatic simulations and policy debates.

Database Heroes Competition | Participant January 2025

Highlighted advanced database management and SQL skills by competing against IT students to solve complex data architecture challenges

Certifications

Competition Finalist Award in the database Heroes IT Competition (2025).

Participation Award in the Alasriyya Model United Nations (2020).

Interests: Highly interested in creative works and artistic expression, dedicated to drawing as a primary hobby and creative outlet.

Languages: Proficient in both Arabic and English.
